CCFSSE ........................................................................ 8
Introduction

This report provides a summary of selected key findings from your institution’s administration of the 2010 Community College Survey of Student Engagement (CCSSE). This document provides important information that we hope you can use to stimulate discussion on your campus about how to improve students' experiences at Windward Community College.

Contents

- **CCSSE** benchmarks for Windward Community College, the 2010 **CCSSE** Cohort, and the top performing colleges by benchmark area
- A report highlighting your institution’s highest- and lowest-performing areas for part-time and full-time students by benchmark
- Results from the 2010 Special-Focus Items
- Selected results comparing student and faculty responses from the Community College Faculty Survey of Student Engagement (CCFSSE), if your college elected to participate in the national administration of that survey in spring 2010; if your college did not participate in the faculty survey, this page provides an example of the report your college would have received

**CCSSE** Online Reporting System

The complete **CCSSE** 2010 results for Windward Community College are available via the new **CCSSE** online reporting system (www.ccsse.org). This reporting site offers intuitive, point-and-click access to data and flexibility in creating reports.

**CCSSE** Resources at www.ccsse.org

- Accreditation Tools providing guidance on using student engagement results in the self-study and reaffirmation process
- Annotated Bibliography containing interactive survey items linked to annotated lists of related research articles
- Communication Tools including customizable templates and discussion guides for sharing survey results
- Focus Group Tools including all the materials needed to plan and conduct student focus groups to add rich qualitative data to your understanding student engagement
- Using **CCSSE** Tools including a **CCSSE** Course Evaluation Form, an end-of-course evaluation instrument that is aligned with **CCSSE** items on effective educational practice, and a Classroom Observation Form, developed for local use in faculty development and evaluation programs
The Community College Survey of Student Engagement uses a set of five benchmarks of effective educational practice in community colleges. These benchmarks allow colleges to gauge and monitor their performance in areas that are central to their work. In addition, participating colleges have the opportunity to make appropriate and useful comparisons between their performance and that of other groups of similar colleges.

Community colleges differ significantly—even dramatically—from one another on variables including size, location, resources, enrollment patterns, and student characteristics. It is important to take these differences into account when interpreting benchmark scores—especially when making institutional comparisons. Furthermore, CCSSE has adopted a policy on “Responsible Uses of CCSSE Data,” available at www.ccsse.org.

The five benchmarks encompass 38 engagement items from the CCSSE survey that reflect many of the most important aspects of the student experience. These institutional practices and student behaviors are some of the most powerful contributors to effective teaching, and student learning, retention, and attainment. For further information about how the benchmark scores are computed, please visit www.ccsse.org.

**CCSSE Benchmarks**

- **Active and Collaborative Learning.** Students learn more when they are actively involved in their education and have opportunities to think about and apply what they are learning in different settings. Through collaborating with others to solve problems or master challenging content, students develop valuable skills that prepare them to deal with real-life situations and problems.

- **Student Effort.** Students’ own behaviors contribute significantly to their learning and the likelihood that they will successfully attain their educational goals.

- **Academic Challenge.** Challenging intellectual and creative work is central to student learning and collegiate quality. These survey items address the nature and amount of assigned academic work, the complexity of cognitive tasks presented to students, and the rigor of examinations used to evaluate student performance.

- **Student-Faculty Interaction.** In general, the more contact students have with their teachers, the more likely they are to learn effectively and to persist toward achievement of their educational goals. Through such interactions, faculty members become role models, mentors, and guides for continuous, lifelong learning.

- **Support for Learners.** Students perform better and are more satisfied at colleges that provide important support services, cultivate positive relationships among groups on campus, and demonstrate commitment to their success.

**Note:** Benchmark scores are standardized so that all CCSSE Cohort respondents have a mean of 50 and standard deviation of 25. * Top performing colleges are those that scored in the top ten percent by benchmark.
Areas of Highest Student Engagement
Windward Community College

Benchmark scores provide a manageable starting point for reviewing and understanding CCSSE data. One way to dig deeper into the benchmark scores is to analyze the items contributing to the overall benchmark score and to disaggregate the data. This section features the five items on which part-time and full-time students scored highest and the five items on which they scored lowest in comparison to the 2010 CCSSE Cohort.

The items below reflect the largest differences (in mean scores) between Windward Community College and the 2010 CCSSE Cohort. However, they may not be the most important to institutional mission or current program or policy goals. It is important to review the college’s 2010 CCSSE Institutional Report for additional results of particular interest.

</table>

**Part-Time Students**

**Full-Time Students**

For instance, a lower percentage of your part-time students (-12.1%), compared to other part-time students in the Cohort, responded 'Sometimes' or 'Often' on item 13e1.

This figure, based on the table above, displays the percentage difference on items in which your students compared least favorably with those in the CCSSE Cohort. Notes below indicate how the frequencies were aggregated.

**Notes:**
- For item 4, 'Often' and 'Very Often' responses were combined.
- For items 5 and 9, 'Quite a bit' and 'Very Much' responses were combined.
- For item 6, responses indicating at least 'Between 5 and 10' were combined.
- For item 7, responses where examinations were rated at least '5' on the 1–7 challenge scale were combined.
- For item 10, responses indicating at least "11-20" hours were combined.
- For item 13, 'Sometimes' and 'Often' responses were combined.
2010 CCSSE Special-Focus Items
Windward Community College

CCSSE has established a regular feature that allows participating colleges and researchers to delve more fully into areas of student experience and institutional performance that are related to student success. Because the Center’s 2010 national report will focus on strengthening student engagement in the classroom, the five 2010 Special-Focus Items elicited new information about students’ educational experiences associated with “deep learning”—experiences, for example, that help to integrate ideas, broaden or change perspectives, and promote reflection and self-criticism.

Of all 2010 CCSSE respondents, 42% report including diverse perspectives (different races, religions, genders, political beliefs, etc.) in class discussions or assignments ‘very often’ or ‘often,’ while 21% indicated ‘never’ having such experiences. Responses from students at your institution are provided below. For a complete frequency distribution report, please visit www.ccsse.org.

In your experience at this college during the current school year, about how often have you put together ideas or concepts from different courses when completing assignments or during class discussions?

In your experience at this college during the current school year, about how often have you included diverse perspectives (different races, religions, genders, political beliefs, etc.) in class discussions or assignments?
In your experience at this college during the current school year, about how often have you examined the strengths and weaknesses of your own views on a topic or issue?

In your experience at this college during the current school year, about how often have you tried to better understand someone else’s views by imagining how an issue looks from his or her perspective?

In your experience at this college during the current school year, about how often have you learned something that changed your viewpoint about an issue or concept?
The Community College Faculty Survey of Student Engagement (CCFSSE) is a companion to the student survey. It elicits information from faculty about their teaching practices, the ways they spend their professional time, both in and out of class, and their perceptions regarding students’ educational experiences. The comparisons of student and faculty responses provide a useful prompt for campus discussions, particularly in those areas where students and faculty seem to be reporting divergent perceptions of the same experience. Since your institution did not participate in CCFSSE, an example report is provided.

**Item 4a. Asked questions in class or contributed to class discussions**

- **Faculty Response**
  - Often: 20%
  - Very often: 80%
  - Cumulative Percent: 91.03

- **Student Response**
  - Often: 40%
  - Very often: 60%
  - Cumulative Percent: 76.68

**Item 4b. Discussed ideas from your readings or classes with instructors outside of class**

- **Faculty Response**
  - Often: 40%
  - Very often: 60%
  - Cumulative Percent: 43.75

- **Student Response**
  - Often: 20%
  - Very often: 80%
  - Cumulative Percent: 23.49

**Item 4c. Received prompt feedback (written or oral) from instructors on your performance**

- **Faculty Response**
  - Often: 80%
  - Very often: 20%
  - Cumulative Percent: 91.72

- **Student Response**
  - Often: 60%
  - Very often: 40%
  - Cumulative Percent: 64.67
