AESTHETICS MEETING May 1, 2011 Monday at 12:40 pm.

Members Present:
Paul Nash, Floyd McCoy, Charles Whitten, Tom Holowach, Bonnie Beatson, Nancy Heu, Toni Martin, Jeff Hunt, Pam De Grossa, Joe Ciotti, and Jeff Hunt.

Visitor: Ardis Eschenberg

Topics:

1. Charge Letter. The committee went over the letter that Doug Dykstra wrote upgrading the committee from an Ad Hoc to a Standing Committee. There were some additional comments from members that wanted a few areas more clear in the letter. I asked the committee to send me their input by this Friday May 6th and I will asked Doug if he is okay with making some changes to the letter.

We are approved as a Standing Committee now. We will be adding on a student from the college onto the committee.

2. Palanakila Courtyard. This was Ben Moffat's project. It is not complete but was adequate for the arts festival. The committee recommended that the project be given to Student Government as a student project to complete the idea of a safe functioning courtyard.

3. Sky Light Design for the Science Building, Imaloa. This was a premature concern from Floyd McCoy. There have been no meetings about this issue as of today.

4. Safety Concerns. This is not an aesthetics issue. These concerns will be given to Rick Murray, our Safety Administrator.

5. Windows. The committee is recommending that a professional window cleaning company come to campus once a year to clean windows that are beyond the reach of the maintenance crew capabilities. We have windows that go up very high and these windows need to be professionally done.

6. Building Wall. One of the walls of Palanakila Building facing the ocean side has become extremely dirty and has a ghetto look to our campus. We are recommending a cleaning to the wall.

7. New Construction. Jeff Hunt updated us on the building designs and work being done on campus. There will be a walk around this Thursday the 5th at 11 am at the Aug Parking lot. Construction will start on the road heading up to Palanakila Building.

8. Lights. The lights on campus at night seem to still be malfunctioning. Tom Holowach reported that just last week that there are streetlights that are not
working. This would fall under a safety issue. I will let Rick know about this. James from maintenance has been working on the lights all last month.

There will be no more meetings this semester. All the above concerns will be address through e-mail to all committee members.

Meeting ending at 1:40 pm.

Paul Nash
Chair and Recorder of minutes.
