This presentation is about the under-reported but crucial aspects regarding climate change. In this talk, he will identify and discuss the deepest roots of the problem and offer strategies both for mitigation and adaptation, in the hopes of avoiding the worst of what is coming.

Stuart Scott was the first environmentalist stockbroker on Wall Street in the mid-1970s. He is currently Deputy Director General for the North American Region and Climate Change Issues of the International Ecological Safety Collaborative Organization (IESCO). He completed his BA degree Mathematics at Columbia University in 1969 and an MS in Computer and Information Science at the University of Florida in 1985. He has taught mathematics, statistics and critical thinking (theory of knowledge) at the college level.

The IESCO is a Non-Governmental Organization (NGO) working with diplomats, governments, and civil society to achieve a greater recognition of anthropogenic threats to human civilization and all of life on planet Earth.

This forum is co-sponsored by Windward Community College and the American Chemical Society-Hawaii Section.
