Questions for the exams will be drawn from unit study guides (based on reading assignments, lectures, texts, paperbacks, movies) that will be distributed two weeks prior to the exams. Make-up exams will only be given in cases of illness (with a doctor’s note) or valid emergency. There is no comprehensive final exam for this course.

2. Assigned Reading Questions: Complete six (6) sets of assigned reading questions. These reading assignments were designed to prepare you for class discussions and for unit exams. Each set of questions is based on reading assignments, paperbacks, handouts, and videos. Late work will be penalized three (3) points.

3. Class Participation: Participate regularly in a variety of in-class activities. They include group discussions, focused free writes, video worksheets, quizzes, and class participation exercises. These activities will require you to demonstrate, in class, your knowledge of the central ideas in the text, paperbacks, videos, handouts. Attendance will be taken at each class and will be used in assigning class activity points. Since these are class activities, they cannot be made up if missed.
MODE OF INSTRUCTION:
In this course, students will learn the history of moral philosophy, rudiments of moral reasoning, and analytical and critical thinking skills.

Classes will combine lectures with discussions. Lectures will focus on ethical theories, ethical issues, philosophical methodology, moral principle, and on topical reading assignments. Discussions and brief writing assignments (in-class), on the other hand, will provide students with an opportunity to critically analyze and/or apply ethical concepts/theories, identify moral issues, and employ philosophical methodology.
