Philosophy 110 Introduction to Logic
03
M-TH: 10:00 – 11:35 (62053)

INSTRUCTOR: Ron Loo
OFFICE: Palanakila 144
OFFICE HOURS: Tues: 8:50 - 9:50 p.m.
Wed: 11:35 - 12:35 p.m.
Thurs: 11:35 - 12:35 p.m.
(Other times by mutual agreement)
TELEPHONE: 236-9144, rloo@hawaii.edu
EFFECTIVE DATE: Summer 2011

Windward Community College Mission Statement
Windward Community College is committed to excellence in the liberal arts and career development; we support and challenge individuals to develop skills, fulfill their potential, enrich their lives, and become contributing, culturally aware members of our community.

CATALOGUE DESCRIPTION:
A study of the foundations and development of rational thought and communication and their applications. Includes analysis of deductive reasoning, formal and informal fallacies, and the use of symbolic systems. This course meets the AA degree Quantitative Reasoning requirement.

ACTIVITIES REQUIRED AT OTHER THAN REGULARLY SCHEDULED CLASS TIMES:
Study Sessions: Highly recommended.

STUDENT LEARNING OUTCOMES:
At the completion of this course, you should be able to:

1. Recognize fallacies of relevance, presumption, and ambiguity.
2. Employ rules of logic in deductive analysis.
3. Construct truth tables for deductive analysis.
4. Use symbolic systems for deductive analysis.
COURSE CONTENT:

Concepts or Topics

• Basic Logical Concepts
  Arguments, Premises, Conclusions
  Deductive and Inductive Arguments
  Validity and Truth

• Analyzing Arguments
  Paraphrasing and Diagramming
  Arguments
  Recognizing Arguments
  Arguments and Explanations

• Fallacies
  Fallacies of Relevance
  Fallacies of Presumption
  Fallacies of Ambiguity

• Symbolic Logic
  Modern Logic and Its Symbolic
  Language
  The Symbols for Conjunction,
  Negation, and Disjunction
  Conditional Statements and
  Material Implication
  Testing Argument Validity on
  Truth Tables
  Statement Forms and Material
  Equivalence

• Methods of Deduction
  Formal Proof of Validity
  The Rules of Inference
  The Rules of Replacement
  Proof of Invalidity

Skills

1. Recognize premises
   and conclusions.
2. Differentiate inductive from
   deductive arguments.
3. Recognize invalid deductive
   arguments.
4. Paraphrase and diagram
   single arguments.
5. Recognize an argument.
6. Identify and explain fallacies
   of relevance, presumption,
   and ambiguity.
7. Construct your own
   examples of fallacies of
   relevance, presumption, and
   ambiguity.
8. Symbolize propositions and
   arguments.
9. Use truth tables to
   determine the validity of
   arguments.
10. Use truth tables to
    characterize statement
    forms as tautologous, self
    contradictory, or contingent.
11. Construct formal proofs of
    validity (by using the rules
    of inference and the rules of
    replacement).
12. Prove invalidity (by the
    method of assigning truth
    values).
COURSE TASKS:

1. Complete all in-class objective quizzes. (These quizzes will require students to recognize and identify fallacies, recognize language functions, symbolize statements and arguments, diagram single arguments, construct truth tables, construct formal proofs of validity, prove invalidity.)

2. Complete all assigned homework from the text, The Worksheet covering chapters 1, 3, 6, 8, 9. (These assignments will test the same skills as those tested in quizzes.) See comment on assigned homework in OTHER INFORMATION.

3. Complete three (3) in-class exams. (The material in this course will be presented in 3 units. An exam will be given upon completion of a unit of study.

MODE OF INSTRUCTION:
Because of the nature of the subject, regular class attendance is essential. Instruction will consist of lectures and problem solving.

METHOD OF GRADING:

1. Letter grades will be assigned based on the number of points accumulated for the course.

   A: 450 - 500
   B: 399 - 449
   C: 348 - 398
   D: 297 - 347
   F: 246 - 296
   W: Formal withdrawal from the course.
Phil. 110 Course Outcomes, 4

METHOD OF GRADING:
2. Weight of tasks:
   
   Homework (or quizzes) 200 = (10 x 20)
   Exams 300 = (03 x 100)
   500

LEARNING RESOURCES AND MATERIALS:
Required: Copi, I.M. and Carl Cohen; Introduction to Logic
          MacMillan (custom ed.)
          Loo, R.J.K. The Worksheet (2nd ed.)

OTHER INFORMATION:
1. Office hours:
   to be announced in class.

2. Class attendance:
   Regular attendance is expected of all students. Students who are absent
   often rarely do well in the course.

3. Class preparation:
   Students are expected to prepare for each class. This means that students
   should complete reading and/or writing assignments prior to class.

4. Study sessions:
   Study sessions will be offered during the semester to reinforce
   concepts/principles presented in class. A total of five (5) points can be
   earned by attending 10 study sessions.

5. Assigned homework:
   Assigned homework will consist of completion of only the following exercises
   from The Worksheet: 1.2, 1.6, 3.2 (P1), 3.3, 8.3 or 8.4, 8.5,
   9.1 (P1), 9.1 (P3), 9.2 (P2) or (P3), 9.3. Late homework will be
   penalized two (2) points per week.
OTHER INFORMATION:

6. Learning assistance:
   Because of the nature of the subject matter, students are advised to seek
   learning assistance from the instructor as soon as they encounter difficulty
   with reading an/or writing assignments.

7. Absences:
   If you are absent, borrow a classmate’s notes and copy those for the day
   you were absent. Students who miss scheduled exams due to unexcused
   absences will be penalized five (5) points per week for late exams.

8. Cell phones:
   Please set your cell phone to “silent” so that the class can focus on the
   lesson of the day.

DISABILITIES ACCOMMODATION STATEMENT

If you have a physical, sensory, health, cognitive, or mental health disability
that could limit your ability to fully participate in this class, you are
encouraged to contact the Disability Specialist Counselor to discuss
reasonable accommodations that will help you succeed in this class. Ann
Lemke can be reached at 235-7448, HYPERLINK"mailto:lemke@hawaii.edu"
lemke@hawaii.edu, or you may stop by Hale ‘Akoakoa 213 for more
information.

Revised May 10, 2007
Phil. 110 Course Outcomes

Philosophy 110
Overview

UNIT 1: What Is Logic?
Arguments, Premises, and Conclusions
Deduction and Induction
Paraphrasing and Diagramming Arguments
Recognizing Arguments
Arguments and Explanations

What Is A Fallacy?
Fallacies of Relevance
Fallacies of Presumption
Fallacies of Ambiguity
Exam #1: May 31 (T)__________

UNIT 2: Symbolic Logic
Symbolic Language
Conjunction, Negation, Disjunction
Material Implication
Argument Forms and Arguments
Material Equivalence
Exam #2: June 15 (W)__________

UNIT 3: The Method Of Deduction
Formal Proof of Validity
The Rule of Replacement
Proof of Invalidity
Exam #3: June 30 (TH)__________

*LAST DAY to submit course work for credit: June 30 (TH) 12:30 pm.
