Describe the information, knowledge, skills gained from your project:

During my two weeks in India, I worked everyday preparing vaccines, talking to citizens about their pets or free-roaming dogs. I walked through villages and towns with the dog catchers and team leaders to vaccinate dogs. I personally vaccinated over 400 dogs and our team vaccinated over 5,000 in the two weeks.

I learned how they mapped and organized such a huge project; how to communicate with people about what we were doing, and how to vaccinate dogs quickly and safely.

Describe how you will apply your experience to further the College’s mission to provide quality post-secondary education:

I prepared a presentation for the students.

The students/graduates see how to use their veterinary nursing skills in ways outside the normal clinical experience. Also, I wanted to demonstrate to the students that there are many opportunities to give back to their community or those communities abroad where there are dramatic needs.

The students also learned a lot about the rabies virus, which while not present here in Hawaii, is a huge problem in other parts of our country and the world.

Describe how you will share your experience with your office, department, or the faculty/staff at large:

I prepared a presentation for the students and would welcome the opportunities to share it with other groups at WCC.
