Describe the information, knowledge, skills gained from your project

I learned about several new programs that I can utilize including Arc which is a communication tool that allows instructors and students to actively collaborate through video and audio media. Also I found being taught more on organization of canvas will be extremely effective towards how I run my on-line classes. Finally I discovered Edpuzzle which is also an exciting tool I want to begin implementing. EDpuzzle is a site that allows users to select a video and customize it by editing, cropping, recording audio, and adding questions to make an engaging presentation or lesson. All of these programs can be embedded into canvas seamlessly and create a better experience for my student!

Describe how you will apply your experience to further the College’s mission to provide quality post-secondary education.

I hope to begin implementing some of the techniques, into my classes within the next year to help with on-line student engagement and student retention in the class. By being at this conference I saw just how popular canvas is with other educational institutions and I agree with using this platform for launching my VETA DEC program completely on canvas.

Describe how you will share your experience with your office, department, or the faculty/staff at large.

I have done several Distance Education talks and hope to use the tools I learned from the conference to show how effective they are in a class setting. I have used canvas before and students all had great reviews on organization and creating an interactive learning environment through on-line which is extremely challenging. Still, many students often drop or fail in on-line courses and my hope is to create something really fun and interactive for the student while learning their curriculum.
