**STUDENT LEARNING OUTCOMES**

The student Learning Outcomes are listed above in the Catalog Description category of this syllabus.

**COURSE CONTENT**

The course picks up where Accounting 201 (Introduction to Financial Accounting) left off by introducing the student to the process used to prepare an indirect method statement of cash flow. The bulk of the course is aimed at exposing the student to the concepts and techniques of managerial accounting. Analytical techniques are introduced for evaluating financial statements and capital investments. The course covers the basic cost accounting involved in a manufacturing operation. The budgetary process is explained and demonstrated. Students’ hone their competency in these areas by working through the assigned homework problems.

2. All homework that is to be graded must be submitted to the instructor via the MyAccountingLab online portal. The MyAccountingLab setup will allow you the whole summer session for each homework submission. You are encouraged to keep your homework completion paced with course outline at the end of this syllabus.
