STUDENT LEARNING OUTCOMES

COURSE CONTENT

The course picks up where Accounting 201 (Introduction to Financial Accounting) left off by introducing the student to the process used to prepare an indirect method statement of cash flow. The bulk of the course is aimed at exposing the student to the concepts and techniques of managerial accounting. Analytical techniques are introduced for evaluating financial statements and capital investments. The course covers the basic cost accounting involved in a manufacturing operation. The budgetary process is explained and demonstrated. Students’ hone their competency in these areas by working through the assigned homework problems.

Because it is very easy to fall behind to a point where catching up is extremely difficult, you are strongly encouraged to pace your homework completion to follow the course outline at the back of this syllabus.

Students’ individual letter grades will be given at the end of the course and will be based on their overall success in percentage terms, weighted as shown in 2. above. Note: Grade percentages shown at the Laulima website are unofficial, and may differ significantly from the student’s final course grade. Students who wish to assess their progress during the semester should arrange to meet with the instructor. Letter grades will be assigned to final student points as follows:

The students who complete, and understand, all of the assigned homework, tend to do very well in this class. It is especially important for the online student to contact the instructor whenever he/she is confused with a particular topic.

2. All homework that is to be graded must be submitted to the instructor via the MyAccountingLab online portal by, December 11, 2014 at 5:00PM. The MyAccountingLab setup will allow you the whole summer session for each homework submission. You are encouraged to keep your homework completion paced with the course outline.

3. If you need a face-to-face meeting with the instructor, please contact him to arrange a time.
