ASTR 110  INTRODUCTION TO ASTRONOMY
CRN 61027, Credits: 3
MW 0830-0945AM, Imiloa 133

INSTRUCTOR: Marvin Kessler
OFFICE: Hale Imiloa 136
OFFICE HOURS: MW, 11:15AM-12:30PM
TELEPHONE: 222-6573  EMAIL: mkessler@hawaii.edu
EFFECTIVE DATE: FALL 2017

WINDWARD COMMUNITY COLLEGE MISSION STATEMENT
Windward Community College offers innovative programs in the arts and sciences and opportunities to gain knowledge and understanding of Hawai‘i and its unique heritage. With a special commitment to support the access and educational needs of Native Hawaiians, we provide O‘ahu’s Koʻolau region and beyond with liberal arts, career and lifelong learning in a supportive and challenging environment — inspiring students to excellence.

CATALOG DESCRIPTION
Introduction to the astronomical universe for non-science students. (3 hrs. lect.)

Activities Required at Scheduled Times Other Than Class Times
One Star-Gazing show at the Imaginarium. These shows are held at 7:00 PM on the second Wednesday of each month. Substitution is permitted if student is unable to attend at that time because of work commitment or similar serious impediment. Substitution must be approved by instructor.

STUDENT LEARNING OUTCOMES
Upon successful completion of the course, the student will be able to:

- Outline the development of astronomy from ancient times to present and explain the role of the scientific method in this historic context.
- Describe and explain the apparent motions of the celestial bodies, especially as related to naked-eye observations.
- Identify the appropriate instruments used by astronomers to understand the universe.
- Outline the origins of our solar system and appraise the leading cosmological theories of the origin of the universe.
- Describe the physical and chemical properties of the objects in our solar system and apply the concept of comparative planetology.
- Describe the physical and chemical nature of stars, and especially our sun, and apply the astronomical techniques used to measure stellar properties.
- Outline the evolutionary stages in a star’s life and compare and contrast the structure of our Milky Way and other galaxies.
- Apply astronomical concepts to the search for extraterrestrial life.
COURSE TASKS
1. Division of time
Class on Monday will be devoted to lecture and assignments. Important sections of the textbook will be highlighted. The focus of this first class of the week will be to listen, take direction, and read. Between Monday and Wednesday the student should read the pertinent pages of the textbook, outline them, and answer the assigned questions at the end of the chapter.
Class on Wednesday will be devoted to reports by students on the questions that were assigned on Monday. Extensive use will be made of the workbook, Lecture Tutorials for ASTR 110 and ASTR 110WT. There will be use of dyads and small groups for discussion. This is a day that will focus on active learning. At the end of the class there will usually be time to write a “one minute paper” or take a short quiz, which will be handed in to the instructor. Some of these will be used for grading. Students will be informed in advance if the paper or quiz will be graded.
2. Audio-Visuals
Several videos will be shown to the class. These videos are chosen for their excellence of presentation and accuracy. The Imaginarium will be used to demonstrate the motion of the stars and the arrangement of constellations.
3. Participating
Students are expected to participate fully with the instructor and their classmates through lecture-tutorial exercises, asking questions in class, and contributing to discussion.
4. Reading
The basic information source is the textbook (listed below). The class calendar (also listed below) gives dates on which each chapter of the textbook will be covered.
5. Calculating
Calculators are not required, but a ruler with both metric and English measurements on it will be needed. Calculators will be helpful for extra credit homework.

ASSESSMENT TASKS AND GRADING
1. There will be three unit Tests, which will be given on the dates indicated on the class calendar. Each test will be worth 25 points, for a total of 75 points for the semester. These tests will be closely coordinated with the classroom discussion and assignments.
2. There will be three Video Essays. The essays will be written responses to an astronomy video that has been shown. The essays will be worth 5 points each, for a total of 15 points.
3. Quizzes. There will be four short quizzes, worth 5 points each, for a total of 20 points.
4. Homework. As indicated above homework will be assigned on Monday and handed in at the beginning of class on Wednesday. Late homework will not be accepted. Mr. Kessler will review the homework and return it on the following Monday. Homework does not contribute points to a student’s grade, but it is extremely important to do as part of the learning process.
5. Attendance at one Wednesday evening Star Show in the Imaginarium is obligatory. It will be worth 10 points. A brief report must be submitted within one week. A report form is provided at the end of this syllabus. If the student cannot attend the Star Show because of work or other serious commitment, a substitute assignment is available.
6. The **Final Exam** will be worth 100 points. It will cover select sections of the entire course. A study guide will be provided.

This adds up to a total of 220 possible points, as follows:

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Three Tests (25 points each)</td>
<td>75 points</td>
</tr>
<tr>
<td>Three Video Essays (5 points each)</td>
<td>15 points</td>
</tr>
<tr>
<td>Four Quizzes (5 points each)</td>
<td>20 points</td>
</tr>
<tr>
<td>Wednesday Star Show (10 points)</td>
<td>10 points</td>
</tr>
<tr>
<td>Final Exam</td>
<td>100 points</td>
</tr>
</tbody>
</table>
| **TOTAL**                            | **220 points**

None of the quizzes or essays may be taken late. The three 25 point tests may be taken late, **only** if Mr. Kessler is contacted the day of the test or before, and he agrees to this. Mr. Kessler may be contacted by telephone (222-6573) or by email at (mkessler@hawaii.edu). Points earned and course letter grade will be recorded on Laulima.

Correspondence between points and letter grade will be as follows:

- A- 90% to 100% of the points,
- B- 80% to 89% of the points,
- C- 70% to 79%,
- D- 60% to 69%,
- F- 0 to 59%.

The grading standards given in the 2015-2017 Windward Community College Catalog, page 30, will be followed. The Catalog allows for other assigned grades. **Students are encouraged to consult the instructor at any time about their grade.** As indicated above, grades are available to students on Laulima.

**LEARNING RESOURCES**

Two books are required:

2. **WORKBOOK**: Lecture-Tutorials for ASTR 110 and ASTR 110WI, by Adams, Prather, and Slater.

These books are available at the Windward Community College Bookstore. Copies of the Videos that are shown in class are on reserve in the library, and some of them may be found on YouTube.

**Additional Information**

Students are strongly encouraged to spend time outside under the night sky, identifying constellations, planets, the moon and their motions across the sky. There are some excellent applications that can be downloaded to smartphones and used for this.

Students also are encouraged to visit WCC’s **AEROSPACE LAB**, located in Hale Imiloa, Room 135. Besides a large collection of astronomy related resource materials.
which the student may borrow, there is a hands-on physical science museum. Phone 235-7321 for availability.

Students are directed to the IMAGINARIUM (planetarium) to avail themselves of the programs presented there on the second Wednesday of the month at 7:00 PM and the second Friday of the month at 7:00 PM. Tickets may be purchased at the Imaginarium box office 30 minutes before the show, or call 235-7433 to reserve tickets in advance. Reserved tickets must be picked up at the box office at least 15 minutes before showtime, otherwise they may be sold to waiting customers. Scheduled events are listed on the college website.

There is a table in the main hallway of Hale Imiloa that contains handouts (monthly star charts and astronomical events) and a list of internet sites for learning about constellations.

**DISABILITIES ACCOMMODATION STATEMENT**

*If you have a physical, sensory, health, cognitive, or mental health disability that could limit your ability to fully participate in this class, you are encouraged to contact Ann Lemke, the Disability Specialist Counselor, to discuss reasonable accommodations that will help you succeed in this class. Ms. Lemke can be reached at 235-7448. lemke@hawaii.edu, or you may stop by Hale 'Akoakoa 213 for more information.*
CLASS CALENDAR FOR FALL 2017

UNIT I  The Celestial Sphere

Week 1  August 21 and 23
   Monday: Introduction to the course
   What would you like to learn from this course?
   Imaginarium: “The Celestial Sphere”
   Wednesday: Chapter 2, Understanding the Sky
   Lecture on the celestial sphere and reason for seasons
   Lecture-Tutorial workbook: “Position”, pp. 1-3
   Quiz: what is the celestial sphere?

Week 2  August 28 and 30
   Monday: Go over homework from last week.
   Assignment of new homework (this will be done each Monday)
   Lecture on the difference between daily and annual motion
   Wednesday: hand in homework (this will be done each Wednesday)
   Complete tutorials in Lecture-Tutorial workbook: “Motion” on pp 3-6,
   “Seasonal Stars” on pp 7-10, and “Eclipse” on pp 11-16
   Quiz: “The Problem”

Week 3  September 4 and 6
   Monday: LABOR DAY-HOLIDAY
   Wednesday: Continue chapter 2.
   Lecture on: phases of the Moon

Week 4  September 11 and 13
   Monday: Continue chapter 2.
   Why do eclipses occur? What causes retrograde motion?
   Wednesday: Test One

UNIT II  TRANSITION

Week 5  September 18 and 20
   Monday: Chapter 3, Changes in Our Perspective
   The Copernican Revolution
   Wednesday: Quiz on Copernican Revolution
   Lecture on Gravity
   How much does the Earth “weigh”?
