ICS 171 (CRN 61508)
Introduction to Computer Security (3 credits)
Fall 2017 (21 August 2017 ~ 15 December 2017) – Online

WINDWARD COMMUNITY COLLEGE MISSION STATEMENT

Windward Community College offers innovative programs in the arts and sciences and opportunities to gain knowledge and understanding of Hawai‘i and its unique heritage. With a special commitment to support the access and educational needs of Native Hawaiians, we provide O‘ahu’s Ko‘olau region and beyond with liberal arts, career and lifelong learning in a supportive and challenging environment — inspiring students to excellence.

Class Details

INSTRUCTOR: John Oshiro
OFFICE: Hale Alaka‘i, Rm 131
TELEPHONE: 808-236-9290
EMAIL: oshiroje@hawaii.edu

Office Hours: I will release office hours during the first week of class via the Laulima site. If you need to meet with me outside of the scheduled hours, let me know via email and we can schedule other meeting times. You can reach me during the day at 236-9290 OR 542-6541, please leave a message if I do not answer. You can also reach me via e-mail (given above). On all correspondence, please add the phrase “ICS 171” to the subject line. I endeavor to answer all emails within 24 hours during the regular work week.

Key Dates:

Last Day of Instruction: 7 December 2017
Finals Week: December 9 ~ December 15 2017
Holidays:

- Labor Day – 4 September 2017
- Veterans Day – 10 November 2017
- Thanksgiving – 23 November 2017
- Non-Instructional Day – 24 November 2017

ICS 171 Course Details

Welcome to ICS 171 – Introduction to Computer Security. In this course we will be exploring the tools, techniques, and principles of Information security, computer defense, cyberspace operations, and information assurance. This class will examine information security topics and related issues across many disciplines/domains including: national, global and defense infrastructures, vulnerability assessment, information and electronic warfare, military/corporate electronic espionage, psychological operations, threat intelligence, physical defense, perception management, network attack/defense, and risk management frameworks. The main goal in this course is to expose students to the vulnerabilities and liabilities of dealing with Information Technology in any form as well as survey the scope of IT security topics. This class will prepare the student for ICS 281 (Ethical hacking) and ICS 282 (Computer Forensics).
Course Description: Examines the essentials of computer security, including risk management, the use of encryption, activity monitoring, intrusion detection; and the creation and implementation of security policies and procedures to aid in security administration. (3 hours lecture). Pre-Requisite(s): ICS 184 with a C or better, or concurrent enrollment, or consent of the instructor.

Student Learning Outcomes: Student learning outcomes for this course are:

- List the first principles of security and describe why each principle is important to security and its relationship to the development of security mechanisms and security policies
- Describe why good human machine interfaces are important to system use, the interaction between security and system usability and the importance for minimizing the effects of security mechanisms
- Analyze common security failures and identify specific design principles that have been violated, and the needed design principle, when given a specific scenario
- List the fundamental concepts of the Information Assurance/Cyber Defense discipline and describe how they can be used to provide system security
- Identify the elements of a cryptographic system and describe the differences between symmetric and asymmetric algorithms, which cryptographic protocols, tools and techniques are appropriate for a given situation, and implementation issues

ASSESSMENT TASKS, GRADING, AND SUBMISSION POLICIES

Course Outline: Course grading breaks down as follows: (No plus or minus grades given, no “rounding”)

<table>
<thead>
<tr>
<th>Component</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Final Projects</td>
<td>25%</td>
</tr>
<tr>
<td>Projects (4x)</td>
<td>40%</td>
</tr>
<tr>
<td>Paper</td>
<td>35%</td>
</tr>
<tr>
<td>Total</td>
<td>100%</td>
</tr>
</tbody>
</table>

Exams format: The final (which is cumulative) will include short answer and true/false type questions. The questions will be based on material presented/covered online. This can include questions that require math calculations and possible drawings. It will be administered via Laulima.

Projects: There are 4 projects that will be released during this class – they will be placed on Laulima site and will be in the schedule. These projects will be based on material covered in class.

Returns: The instructor endeavors to return all graded assignments to the students within two weeks of receipt (most times its less than 1). Exams may take up to 2 weeks to grade and return.

Late Policy: If a student will miss a deadline or due date due to work, deployment, medical or personal problems, etc., they MUST notify the instructor ahead of time. All missed deliverables will be given a grade of zero, unless prior arrangements are made with the instructor. This should NOT be a common occurrence.

Incompletes: No Incompletes or N grades will be given except in the most extreme of emergencies (at the Instructor’s discretion – e.g.: death in the family).
Access: You should be logging into Laulima at least once a week and completing the required weekly assignments. It is possible to get ahead, but you should still endeavor to log in at least weekly. Students bordering on in-between grades will be given the higher grade if in the opinion of the instructor have been showing a regular presence on the Laulima system.

COURSE PLAN

Schedule A schedule of assignments and due dates will be posted during the first week of class on the Laulima site.

Handouts: There may be various handouts given to students during the semester. These items will be emailed and posted to Laulima. These handouts cover material that could be covered on an exam.

LEARNING RESOURCES

Laulima: Laulima is an online course management system and will be used extensively in this course. The class schedule, assignments, and announcements will be posted and administered through Laulima. (https://laulima.hawaii.edu/portal). The class Announcements will also include the Due Dates for any course work that may be due at the end of each week. It is CRUCIAL to check your email, the Course Schedule, and the Announcements page regularly to make sure you are keeping up with the requirements and pace of the course.

Required software and System. No special software is required for this course beyond MS office (or equivalent) 2013 or higher. This class will include submission of papers and other assignments requiring use of a word processor, possibly spreadsheet software (e.g. Excel), and regular, internet access to browser websites for research. You can download free versions of Office 365 (available to WCC students) through special programs with Microsoft – contact the instructor or the WCC bookstore if you wish to avail yourself of this. Windward Community College also provides computers for your use in the library, lab, and in specific areas in Hale Pālanakila.

Instructor Expectations and Principles:

1) It is your personal responsibility as an online student to ensure that you have an access to a reliable computer with the Internet connection.

2) It is the burden of the student to demonstrate mastery of course material to the instructor.

3) If you are having problems – ask! Don’t let confusion grow. I will assist you as needed, but you still must get the correct solution before you get credit – I will not do your thinking for you.

4) You can work with others, BUT, ensure you must submit your own work - do not “work together” on a solution then make copies for each person to turn in. If you “work together” to gain understanding, ensure you separate before you prepare your submission – if the submissions look too similar you may be asked to prove that it is your work.

5) Don’t let other students copy – it is your responsibility to ensure that your work is not made available to others. Academic dishonesty “F”s often times comes in pairs.

6) Any activity that diminishes the instructor’s ability to analyze and rate a student’s individual knowledge of course material is prohibited.

7) Complete assignments on time. Assignments should be professional and meet the highest standards with regards to: logic, research, and content, grammar, and spelling.

8) Be prepared for tests and exams. This can be accomplished by working all assignments and reading ahead.

9) Think before putting pen to paper (or fingers to keyboard). Analysis is key; thinking and understanding prior to attempting to solve a problem is critical.

10) Time goes by very quickly and there is a lot of work to be accomplished. You will likely be putting in anywhere from 10-12 hours a week doing assignments, reading, or doing research. Unexpected things happen often in life – do your best to get ahead so you can more easily deal with these events. Good time management and study discipline will be critical for keeping up in the class and doing well.

11) Communicate early and often with the instructor – and discussions of material (not exams) with other students is highly encouraged.

12) If you have problems or issues (e.g. illness, housing, death in the family, etc.) during the semester, let me know as soon as possible; we can work together to get your through this class. But I can’t help you if I don’t know about it.
Conduct and Academic Dishonesty Policies

Online Conduct: Everything done electronically on the university systems or via email can be considered public record and you are part of the larger, global, online community. As such, it is expected that all students demonstrate appropriate language, behavior, respect, and understanding that would prevail in any campus situation. All students should do their part to ensure a pleasant and safe online environment for others – including:

a) Watching for virii, worms, bots, etc. Do not allow these items, or any other type of code that disrupts or interrupts/interferes with other users’ use of the online environment.
b) Showing respect for all faculty, students, staff regardless of age, race, gender, religion, national origin, veteran’s status, disabilities, sexual orientation, etc.
c) Being honest. Misrepresentation of any kind will not be tolerated. This includes any type of identity theft or intentional electronic “fakery” (spoofing, relaying, etc.)
d) Being polite. Ensure that any content submitted electronically is free from harmful, threatening, libelous, and abusive content. This also includes profanity.

Submissions The Internet is a great research tool and it should be utilized as often as possible as a study aid; but please ensure that you DO YOUR OWN WORK. Turning in material that is plagiarized is a serious offense. Study and use the information found on the internet (and any other sources) to help you understand, but when it comes time to do your work – use your own words, and do not copy, cite, or attempt to “paraphrase” or “rephrase” someone else’s work. If you truly understand the material, you will be able to use your own words and examples. Also, consider your source when reading information on the Internet – not everything out there would be considered a “reputable” source. Be aware that all submitted items can be run through academic tools which scan for and can catch plagiarism attempts.

Academic Dishonesty: The penalties for academic dishonesty are explicitly noted in the Windward Community College student conduct code. Students are expected to maintain the highest moral and ethical standards. Any student, who cheats, lends assistance to others or hands in work that is not his/her own, will be penalized as outlined in the student conduct code. Furthermore, each student is responsible for ensuring that their work is not made available to others for study or duplication. Ignorance of this policy is no excuse of any academic dishonesty. Ensure your work is your own. Copyright infringement or violation of patent, trademark, proprietary information, and/or confidentiality agreements will not be tolerated. Consequences include (but are not limited to)

1st offense – a “0” for the assignment for all involved and a written warning
2nd offence – an “F” for the class

*The instructor reserves the right to notify the administrative offices of any academic dishonesty violations – this can incur separate consequences such as probation or worse.

DISABILITIES ACCOMMODATION STATEMENT

If you have a physical, sensory, health, cognitive, or mental health disability that could limit your ability to fully participate in this class, you are encouraged to contact the Disability Specialist Counselor to discuss reasonable accommodations that will help you succeed in this class. Ann Lemke can be reached at 235-7448, lemke@hawaii.edu, or you may stop by Hale ‘Akoakoa 213 for more information.
