COURSE TASKS

This course is based on adult learning theory. You are an adult, right? Ok, but what type of learner are you? Have you learned how to learn? Have you learned how to assess your own learning? Have you learned how to learn and share openly on the Internet? Have you learned how to be positive, effective and engaging when you learn online? You will in this course! Yea

This course will actively introduce you to social media. The emphasis will be on actively developing your thinking. Everything we do will be designed to help you become better and better at thinking about social media. You will be internalize information by using it actively each week to attempt to improve your thinking. Therefore the primary purpose of learning about social media is to help you develop your thinking or reasoning skills. Why is this important? The quality of every decision you make about social media will be directly determined by the quality of your reasoning abilities. In fact the quality of your life in general will be determined by how well you think in general. Don't worry, you will have fun learning. When you are having fun you open yourself to new possibilities. That is why having an open mind is the first requirement for learning. By the end you this course you will be able to create a social media campaign, based on your purpose.
