Typing Hawaiian Diacritics in Mac OS X

1) In your document, click once where you want the Hawaiian character to go.

2) Click on the flag at the far right of the menu bar.

3) Choose “Show Character Palette.” (If no flag, see instructions below.)

4) In the new window, “Roman” should show in the View list (top left corner) and “Accented Latin” should be highlighted in the list below. If not, change them.

5) Scroll up and/or down until you find the character you want, then double-click on it. It will be automatically inserted into your document. In the example above, the letter “E” with the kahakō is selected.

If no flag on the menu bar:
1. Click on the blue Apple in the top left-hand corner of the screen.
2. Click on “System Preferences...”
3. After the System Preferences window opens, click on the International icon.
4. Click on the "Input Menu" tab.
5. Click the boxes for "Character Palette" and "Show input menu in menu bar".
6. Quit “System Preferences...” (Click on the red dot at the top left-hand corner of the window.)
