Activities Required at Scheduled Times Other than Class Times

MyLab Math is an online learning resource. Every week you will be assigned online assignments through MyLab Math. Most exercises include learning aids, such as guided solutions, sample problems, and extra help as you're working through them, and they offer helpful feedback when you enter incorrect answers. A variety of multimedia resources are also available in the homework exercises. You can link to the ebook, video clips, and animations to improve your understanding of key concepts. Videos are captioned in English, and several courses are also captioned in Spanish.

This course will be participating in the Bookstore’s Interactive Digital Access Program (IDAP). Through this program, you will access your course material digitally, and it will be available to you by the first day of class.
A charge for the digital course material through IDAP will be added to your MyUH account. You have the option to opt-out of receiving your course material through IDAP. By opting-out, you will lose access to the course material and the charge will be refunded on your MyUH
account. If you do not opt-out, the charge will stay on your MyUH account. Any unpaid charges on your MyUH account will turn into a hold. Holds on your account will prevent you from accessing various services within the University.
You may opt-out by visiting your unique Inclusive Access Student Portal, which can be found in your IDAP welcome email (Subject Line: “IMPORTANT: You have enrolled in an IDAP Course”).
For more information regarding IDAP, please contact your campus bookstore.

STUDENT LEARNING OUTCOMES

As a result of taking this course, students can expect to attain the following outcomes:

1. Graph or interpret algebraic relations that are relevant to the topics in this course
2. Employ algebraic techniques to find the solutions to equations or inequalities, or systems of equations or inequalities appropriate to the level of this course
3. Use algebraic techniques to analyze and solve applied problems
4. Utilize precise mathematical language and symbols to effectively communicate mathematics in written and/or oral form

FOUNDATION Quantitative Reasoning HALLMARKS

Math 103 also fulfills 3 credits of the General Education requirements (Foundations Quantitative) for both the AA degree at WCC and a Bachelor’s degree at UH Manoa. Consequently, it meets the hallmarks of the quantitative reasoning requirement.

The course will:

1. Provide students with theoretical justifications for, and limitations of, mathematical or statistical methods, and the formulas, tools, or approaches used in the course.
2. Include application of abstract or theoretical ideas and information to the solution of practical quantitative reasoning problems arising in pure and applied research in specific disciplines, professional settings, and/or daily and civic life.
3. Provide opportunities for practice and feedback that are designed to help students evaluate and improve quantitative reasoning skills by including a course component at least once per week with a maximum 30:1 student-to-teaching ratio.

4. Be designed so that students will be able to
   a. Identify and convert relevant quantitative information into various forms such as equations, graphs, diagrams, tables, and/or words;
   b. Select appropriate techniques or formulas, and articulate and evaluate assumptions of the selected approaches;
   c. Apply mathematical tools and perform calculations (including correct manipulation of formulas);
   d. Make judgments, create logical arguments, and/or draw appropriate conclusions based on the quantitative analysis of data, the assumptions made, the limitations of the analysis, and/or the reasonableness of results;
   e. Effectively communicate those results in a variety of formats

### COURSE TASKS

This is an asynchronous course. Students independently watch lecture videos in order to complete homework sets and quizzes. Discussion forums are a large part of this course. Students post within the discussion forums and are expected to reply to their classmates’ posts. After the completion of each unit, a review and an exam will be conducted.

### ASSESSMENT TASKS AND GRADING

The student will demonstrate competency in the objectives by completing and turning in all assignments as requested, by taking unit exams, and by taking a final exam over concepts and skill covered in the entire course. Unit exams and the final exam are to be taken without any references unless otherwise stipulated by the instructor.

Unless permission is granted by the instructor, assignments and tests must be completed and submitted to the instructor at the specified date and time. **Due dates for section assignments and quizzes fall on Sundays. Exams need to be completed by Fridays.** The only exception is the last week where the final exam must be completed by Wednesday, May 11.

Points will be assigned to each graded assignment, class activity, and tests as follows:

**MyLab Math.** Homework sets will be graded on a 0 - 10 point scale. Assignments are to be completed by the designated date.

**Discussions.** Every week there will be a discussion through Laulima. Each discussion will be graded on a 0 - 10-point scale. You will need to reply to the main discussion topic.

**Quizzes.** Weekly quizzes will be graded on a 0 - 10-point scale through MyLab Math. The weekly quizzes will be timed and will consist of a few questions from the week’s lessons.

**Unit Exams.** There are four unit exams. A unit exam will be approximately 100 minutes in length and will be scored on a 100 point scale. Each exam must be completed by the assigned due date. **There are no retests.**

**Showing and Submitting Work for Exams.** On paper, in a notebook, or digitally, please show all your work in an organized, orderly fashion and number each question. After you submit an exam

*Windward Community College is an equal opportunity, affirmative action institution.*
through MyLab Math, you must immediately upload your work as a single pdf to Laulima’s Drop Box. You’re welcome to use a scanner. There are also many apps that can create pdfs using your phone. This needs to be done within 10 minutes of submitting your test online. Doing so allows me to give you partial credit for problems you did incorrectly. Your work is also what earns you credit. If you don’t show meaningful work, points will be deducted even if you get the answer correct.

**Exam Reviews.** Prior to each unit exam, students will be assigned an exam review as preparation. This exam review must be at least 90% completed prior to taking the exam.

**Make-up.** Make-up opportunity for exams will be possible only upon a timely presentation of a serious and justified explanation of the student’s inability to take the exam on the designated date. The instructor has the right to request documentation of the student’s inability to take the exam on the designated date is justified. **No more than one test or exam may be taken by a student on a make-up basis.**

**Final Exam.** The final exam will cover the concepts and skills in the entire course. The final exam is double the length in time of a unit exam and will be scored on a 100-point scale. There is no retest or make-up.

**Course grade.** A letter grade for the course will be assigned according to the level of achievement as provided in the table below:

<table>
