

UNIVERSITY of HAWAII®
WINDWARD
COMMUNITY COLLEGE

PHYL 141: Human Anatomy and Physiology

3 Credits CRN 64075

HYBRID*

*This is a hybrid course. Although most course materials (lectures, quizzes, discussion assignments, and practice exams) can be completed asynchronously at home, the three exams must be completed at a pre-approved UH Testing Center.

INSTRUCTOR: Ross Langston, PhD

OFFICE: Imiloa 115

OFFICE HOURS: By appointment via [Star Balance](#)

TELEPHONE: 808-429-6218 (cell) Email: langston@hawaii.edu

EFFECTIVE DATE: Fall, 2024

WINDWARD COMMUNITY COLLEGE MISSION STATEMENT

Windward Community College offers innovative programs in the arts and sciences and opportunities to gain knowledge and understanding of Hawai'i and its unique heritage. With a special commitment to support the access and educational needs of Native Hawaiians, we provide the Ko'olau region of O'ahu and beyond with liberal arts, career and lifelong learning in a supportive and challenging environment — inspiring students to excellence.

CATALOG DESCRIPTION

PHYL 141 is the first semester of a comprehensive two-semester course which provides a thorough introduction to the structure and function of the human body. PHYL 141 covers the gross anatomy, histology, and physiology of the integumentary, skeletal, muscular, and nervous systems. Students will be expected to learn details of anatomy and physiology as well as applying those details in the broader context of whole-body function and homeostasis. The covered topics include body orientation, chemical level, cellular level, tissue level, integumentary system, bone tissue, skeletal system, joints, muscular tissue, muscular system, nervous tissue, spinal cord and spinal nerves, brain and cranial nerves, autonomic nervous system, and special senses. (3 hours lecture)

STUDENT LEARNING OUTCOMES

Upon successful completion of PHYL 141, the student should be able to:

1. Identify required anatomical structures of the covered systems
2. Identify required physiological functions of the covered systems
3. Describe metabolic processes of covered systems and relate them to everyday activities such as eating, sleeping, and exercise
4. Explain the concepts of positive/negative feedback and homeostasis and relate them to physiological processes covered in the course

COURSE CONTENT. (This section is optional)

Concepts or Topics

The student will describe and integrate basic biological principles and define basic biological terms presented in lecture, required texts, and other instructional materials. These principles include the following areas:

- Philosophy and characteristics of science and the scientific method;
- The difference between hypotheses, theories and laws;
- Hierarchical architecture of the human body (cells, tissues, organs, and organ systems);
- The chemical composition of the human body and the functions of the major groups of biological molecules;
- Anatomy and physiology of cells including: protein production, cellular respiration, mitosis, and meiosis, senescence and cell death (apoptosis).
- Anatomy and physiology of the systems that make up the human body, including skeletal, integumentary, muscular, and nervous systems.
- Mechanisms for maintenance of homeostasis in the human body.

COURSE TASKS

- 1) Complete assigned readings prior to viewing the lectures.
- 2) View online lectures and take detailed notes.
- 3) Complete weekly online quizzes.
- 4) Complete three practice exams
- 5) Complete three class examinations at the WCC testing center (ID required).
- 6) Complete three discussion board assignments.

ASSESSMENT TASKS AND GRADING

EXAMINATIONS (600 points total-200 points for each exam). The student will take THREE exams (non-cumulative) to demonstrate knowledge and understanding of information presented in the lectures, lecture outlines text readings, and study guide activities. **Exams must be taken at an approved UH testing center.**

QUIZZES (130 points- 10 points for each quiz). The student will take 15 online quizzes which cover material from the lecture and reading. **Quizzes may be taken from home, but they MUST be taken by the indicated deadline (typically 11:00 PM each Friday).** Each quiz can be taken up to FIVE times; only the highest score will be saved. Please note that quizzes cannot be made up for any reason, including network problems or personal emergencies. The lowest TWO quiz grades will be dropped at the end of the semester. As with exams, quizzes will be timed (typically 30 s to 1 min per question, depending on difficulty). Quizzes may be taken open-book, but be warned that if you don't study beforehand you may not be able to complete the quiz before the deadline lapses.

CLASS DISCUSSIONS (60 points total- 20 points for each activity). Each student will complete three discussion board assignments on selected topics. The purpose of these assignments is to facilitate open discussion of course topics between students in the class. For discussion boards, you will be required to post a response based on the guidelines posted by your instructor. You will also be required to read and post responses to at least TWO of the posts from your fellow students. Both your initial post and your responses MUST be completed by the deadline. Be aware that some posts may require you to create informational

videos using YouTube. **For this reason, a webcam is mandatory for this course.** Your posts and responses will be graded based on effort, clarity, and accuracy. The topics and guidelines for each discussion board will be posted on the course website under “Announcements” two weeks before the assignment is due.

Exam Reviews (30 points). Students will complete a practice exam prior to each unit exam. The practice exam will consist of exam questions from the previous semester and quiz bank questions. Students can take the exam review two times and only the highest grade will be saved.

METHOD OF GRADING

The assignment of points will follow the general schedule below. There may be more or less points in the course depending on the final number of assignments.

Exams	600 points
Quizzes	130 points
Discussions	60 points
<u>Exam Reviews</u>	<u>60 points</u>
TOTAL	850 points

GRADING SCALE

Percentage Points	Grade
90-100	A
80-89	B
70-79	C
60-69	D
0- 59	F

Please note that “N” grades are not given for this course.

Grades may be curved at the instructor’s discretion; however, the student should use the above grading scale to evaluate their performance throughout the class. If you miss an examination because of an illness or legitimate emergency, you must contact the instructor **within 48 hours** to arrange a time to take a make-up exam. The instructor will request that the student present evidence of the illness or emergency that caused the student to miss the exam. If the student misses an exam for any other reason, the student may be prohibited from taking a make-up exam, thus failing to receive any points for the missed exam. While make-up exams will cover the same content area as a missed exam, the exam format and specific questions may be different.

No retests will be given for any reason.

LEARNING RESOURCES

Textbook: [Anatomy and Physiology UH OER](#)

Course Website: Laulima.hawaii.edu

ADDITIONAL INFORMATION (This may be included here or in an appendix.)

STUDENT RESPONSIBILITIES

The student is expected to attend lectures, participate in all course activities, and complete all

examinations and course assignments on time. Please be considerate to other students by turning off cell phones during class. Any changes in the course schedule, such as examination dates, deadlines, etc., will be announced ahead of time on the course website. It is the student's responsibility to be informed of these changes. It is the student's responsibility to be informed about deadlines critical to making registration changes (e.g., last day for making an official withdrawal).

DISABILITIES ACCOMMODATIONS

If you have a physical, sensory, health, cognitive, or mental health disability that could limit your ability to fully participate in this class, you are encouraged to contact the Accessibility Counselor to discuss reasonable accommodations that will help you succeed in this class. Jodi Asato, Disabilities Counselor, can be reached at (808) 235-7472, jodiaka@hawaii.edu, or you may stop by Hale Kāko‘o 105 for more information.

SEX DISCRIMINATION AND GENDER-BASED VIOLENCE RESOURCES (TITLE IX)

Windward Community College is committed to providing a learning, working, and living environment that promotes personal integrity, civility, and mutual respect and is free of all forms of sex discrimination and gender-based violence, including sexual assault, sexual harassment, gender-based harassment, domestic violence, dating violence, and stalking.

If you or someone you know is experiencing any of these, WCC has staff and resources to support and assist you. To report an incident of sex discrimination or gender-based violence, as well as receive information and support, please contact one of the following:

Leslie Cabingabang, UH System Confidential Advocate
 Phone/Text: (808) 348-0432 or (808) 341-0952
 Email: advocate@hawaii.edu
 Office: Hale Kāko‘o 107 (Wednesdays)

Mykie E. Menor Ozoa-Aglugub, J.D., Title IX Coordinator
 Phone: (808) 235-7468
 Email: mozoa@hawaii.edu
 Office: Hale Kako‘o 109

As a member of the University faculty, I am required to immediately report any incident of sex discrimination or gender-based violence to the campus Title IX Coordinator. Although the Title IX Coordinator and I cannot guarantee confidentiality, you will still have options about how your case will be handled. My goal is to make sure you are aware of the range of options available to you and have access to the resources and support you need.

For more information regarding sex discrimination and gender-based violence, the University's Title IX resources and the University's Policy, Interim EP 1.204, go to manoa.hawaii.edu/titleix/

Student Responsibilities

STUDENT RESPONSIBILITIES

You are expected to attend lectures, participate in all course activities, and complete all examinations and course assignments on time. Please be considerate of other students by turning off any cell phones or beepers during class. Any changes in the course schedule,

such as examination dates, deadlines, etc., will be announced ahead of time. It is your responsibility to be informed of these changes. It is also your responsibility to be informed about deadlines critical to making registration changes (e.g., last day for making an official withdrawal).

HOW TO SUCCEED IN THIS CLASS

Although you will be given lecture outlines, you will not succeed in this class without attending lectures and taking detailed notes on the corresponding material in the textbook. Merely reading the chapter will not suffice. Science courses at WCC generally require a minimum of two to three hours of independent study time for each hour in class. It is your responsibility to allocate the appropriate amount of time needed for study and be realistic about all personal and professional commitments that may infringe on your study time.

As part of your studies, you will need to understand a veritable *mountain* of medical and anatomical terms, most of which will probably be foreign to you. Many students find it helpful to enroll in HLTH 125 (Survey of Medical Terminology) at the same time as PHYL 141, as there is some repetition in the material covered. In this course, most important vocabulary words appear in **boldface** throughout your textbook. One way to learn these vocabulary words is to make flash cards to quiz yourself. Answering the matching and fill-in-the-blank questions located in the back of each text chapter can also be a helpful way to learn new terms. Be warned: Merely knowing the *definitions* of vocabulary words will be of little use if you do not know how the anatomy of the structures they represent.

In addition to vocabulary, you will be expected to have a detailed understanding of the mechanisms regulating human body systems. In many cases, these systems are regulated by negative feedback loops. **Knowledge of negative feedback mechanisms is absolutely crucial to understanding how the human body maintains homeostasis.** For example, you should know how the body maintains optimal blood calcium levels. To answer this type of question effectively, you will need to develop an intuitive understanding of how the body monitors blood calcium and what actions it takes when blood calcium is too low or too high. One way to do this is to make a diagram of how the feedback loop works. Most negative feedback loops have 3 parts. 1) a **receptor**, which monitors the condition (in this case, blood calcium levels) 2) a **control center** that “decides” when the condition has exceeded optimal set point values 3) and an **effector** that modifies the values of a controlled condition as directed by the control center. Once you have created your diagram (and labeled the above parts) you should ask yourself what type of **stimuli** may cause the controlled condition to drop below or exceed the setpoint and then trace the steps necessary to bring the controlled condition back into homeostasis (back to the setpoint).

My #1 Suggestion for success in this class: Take weekly quizzes **EARLY**, even if you have not had a chance to properly study for the quiz. This will prevent you from receiving a “zero” score should you forget to take the quiz by the deadline. It will also help you to better direct your studying so you can do better on future attempts for the same quiz. Remember, only your **HIGHEST** score is saved for each quiz. You will only be able to take each exam once. This means you should study diligently before going to the testing center to take the exam. **NO RETESTS WILL BE GIVEN!**

ALTERNATE CONTACT INFORMATION

If you are unable to contact the instructor, have questions that your instructor cannot answer, or for any other issues, please contact the Academic Affairs Office: Alaka'i 121 (808) 235-7422

Course Schedule

*** Please note this schedule is tentative & subject to change. Any changes will be announced in-class or on the course website!**

Week	Date	Topics	Text	Assignment Due FRIDAY
1	8/26-8/30	Course Intro/Orientation to A&P	CH 1	8/30: Chapter 1 Quiz
2	9/2-9/6	Chemistry Biological Macromolecules	CH 2	9/6 Chapter 2 Quiz DB#1
3	9/9-9/13	Intro to the Cell & Membrane Trans Cellular Organelles & Cell Division	CH3	9/13 Chapter 3 Quiz
4	9/16-9/20	Tissue Level of Organization	CH4	9/20 Chapter 4 Quiz
5	9/23-9/27	The Integumentary System Exam #1 Review	CH5	9/27 Chapter 5 Quiz Practice Exam 1
6	9/30-10/4	Bones & Skeletal Tissue Axial Skeleton	CH6 CH7	10/4 EXAM 1 (CH 1-5)
7	10/7-10/11	Appendicular Skeleton Joints & Joint Movements	CH8 CH9	10/11: Chapter 6 Quiz
8	10/14-10/18	Muscle Tissue & Phys	CH 10	10/18: Chapter 7 & 8 Quiz DB#2
9	10/21-10/25	Muscular System	CH 11	10/25: Ch 9 Quiz Ch 10 Quiz
10	10/28-11/1	Exam #2 Review		11/1: CH 11 Quiz Practice Exam 2
11	11/4-11/8	Fundamentals of the Nervous System & Nervous Tissue	CH 12	11/8 EXAM 2 (CH 6-11)
12	11/11-11/15	CNS I: The Brain CNS II: Spinal Cord	CH 14 CH 13	11/15: Chapter 12 Quiz
13	11/18-11/22	Cranial Nerves Peripheral/Somatic Nervous System		11/22: Chapter 13 & 14 Quiz
14	11/25-11/29	Special Senses	CH 15	11/29: PNS Quiz
15	12/2-12/6	Autonomic Nervous System	CH 16	12/6: Chapter 15 Quiz DB#3
16	12/9-12/13	Exam #3 Review		12/13 Chapter 16 Quiz Practice Exam 3

- Last day for full refund: September 3rd
- Last day to drop without “W” grade: September 17th
- Last day to Withdraw (“W” entered on transcript): November 4th
- **Final Exam:** Due by 11 PM on December 20, 2024
