

UNIVERSITY of HAWAII®
WINDWARD
COMMUNITY COLLEGE

ERTH 103, GEOLOGY OF THE HAWAIIAN ISLANDS

3 Credits (CRN [62179](#))

Online

INSTRUCTOR: Dr. Arjun Aryal
OFFICE: Hale Imiloa 119
OFFICE HOURS: W 12 to 2 PM, via Zoom; see announcement for Zoom ID
TELEPHONE: 8082369257 **EMAIL:** aryal@hawaii.edu
EFFECTIVE DATE: SPR 2024

WINDWARD COMMUNITY COLLEGE MISSION STATEMENT

Windward Community College offers innovative programs in the arts and sciences and opportunities to gain knowledge and understanding of Hawai‘i and its unique heritage. With a special commitment to support the access and educational needs of Native Hawaiians, we provide the Ko‘olau region of O‘ahu and beyond with liberal arts, career and lifelong learning in a supportive and challenging environment — inspiring students to excellence.

CATALOG DESCRIPTION

Hawaiian geology and geological processes: origin of Hawaiian Islands, volcanism, rocks and minerals, landforms, stream and coastal processes, landslides, earthquakes and tsunamis, groundwater, geological and environmental hazards. Field trips arranged. (3 hrs. lect.) WCC: DP

STUDENT LEARNING OUTCOMES

As a result of taking this course, students can expect to attain the following outcomes:

1. Students can explain the relevance of geology and geophysics to human needs, including those appropriate to Hawaii, and be able to discuss issues related to geology and its impact on society and planet Earth.
2. Students can apply technical knowledge of relevant computer applications, laboratory methods, and field methods to solve real-world problems in geology and geophysics.
3. Students use the scientific method to define, critically analyze, and solve a problem in earth science.
4. Students can reconstruct, clearly and ethically, geological knowledge in both oral presentations and written reports.
5. Students can evaluate, interpret, and summarize the basic principles of geology and geophysics, including the fundamental tenets of the sub-disciplines, and their context in relationship to other core sciences, to explain complex phenomena in geology and geophysics.

COURSE TASKS

Weekly study guide or ‘roadmap’: Please check Laulima portal /Resources/Week# for a weekly ‘roadmap’. This study guide will describe your course resources, assignments, and expectations for the corresponding week.

Weekly Zoom meeting: There will be one Zoom meeting (office hour) every week during office hours, W 1:00 PM-2:00 PM. But a separate arrangement can be made if you need something else. All the materials will be available online to complete the course asynchronously.

Online discussions/Lab visits: Students must access Laulima frequently (at least once a week), and check emails, announcements, and discussions regularly. Students are highly encouraged to visit the Geology lab at WCC, but it will depend on the campus guidelines. Please get in touch with me for in-person meetings or lab visits.

Homework and Quiz: A weekly quiz and/or homework will be provided. They will be available on Mondays and due Saturdays (midnight).

Final: There will be one final exam. Most of the questions will be in multiple-choice format. The exams will be in Laulima.

Project: Writing an article related to the geology of Hawai‘i is required. Suggested topics will be given, but students are highly encouraged to find their own topic of interest for this term project. It is highly encouraged that your writing will compare the geologic process/event/feature to the Hawaiian explanation (or myth or legend) when possible. Specific instructions about your project work will be provided later. I highly encourage you to write a newspaper or magazine-type article and submit it for publishing.

Grading: Grading will be based on the following points of distribution

Quiz	25%
Homework	25%
Project (one)	25%
Final exam	25%

Online Discussion/Office hour visits 5% (extra credit)

Letter Grade Breakdown: A = 90%+; B = 80 – 89%; C = 70 – 79%; D = 60 – 69%; F = < 60%

Please check your grade book in Laulima regularly.

Make-Up Exams/Early Exams: Midterm and Finals will be available for a couple of days, and therefore there will be no Make-up exams unless there is a very legitimate reason, such as illness or family emergency. Please get in touch with me as soon as possible if such a situation arises. Note: make-up and/or early exams might be in essay format and may be substantially more time-consuming.

COURSE CONTENT

Concepts or Topics and Schedule (Tentative):

Please check the weekly ‘roadmap’ at /Resources/Week# folder in Laulima for more details.

Week #, Week of	Topic(s)
1, Mar 4	Setting the stage, Introduction to Geology, Earth Layers, Plate Tectonics, Minerals, Rocks and Rock Cycle
2, Mar 11	Life Stages of Hawaiian Volcanoes, Calderas and Rift Zones, Lō‘ihi Kīlauea and recent eruptions in Big Island, and Mauna Loa Earthquakes, Tsunami
Match 18	SPRING RECESS
3, Mar 25	Hawaiian Eruption Styles, ‘A‘ā and Pāhoehoe lava, Lava flows, Vents and pyroclasts, Mauna Kea, Glaciers, Hualālai, Project Overview
4, Apr 1	Kohala, Soil Formation, Streams, Water Erosion, ET Volcanoes
5, Apr 8	East Maui, Haleakalā, West Maui, and Rejuvenation, Lāna‘i and Kaho‘olawe, East and West Moloka‘I, Aeolian Processes
6, Apr 15	O‘ahu (Ko‘olau and Wai‘anae), Giant Avalanches and Submarine Geology, Kaua‘i, Ni‘ihau, Papahānaumokuākea
7, Apr 22	Groundwater Hydrology, Shorelines, and Sea Level, Climate Change Adaptation, Project submission
8, Apr 29	Review, Final Exam

LEARNING RESOURCES

Course Website: <https://laulima.hawaii.edu/portal>

Textbook: There is no particular textbook for this course, and all the required study materials will be provided in Laulima.

Reference book: Only for your reference.

Roadside Geology of Hawai‘i (Hazlett & Hyndman, 2022, Mountain Press Publishing Company, ISBN-978-0-87842-711-6).

Your library has some copies of the book

ADDITIONAL INFORMATION

General Description of the Course:

"Civilization exists by geological consent, subject to change without notice." [Will Durant, American historian]

Are you wondering what causes the eruption of Kilauea's summit and rift zone and when it will be pau (or paused)? And what is the science behind Hawaii's 'Smiley Face' Volcano? How did the lava lake at the Halemaumau crater change to a hot water lake and now back to the lava lake? Or, would you like to know how the mountains, valleys, craters, beaches, reefs, etc., formed in Hawaii? What processes shaped them into what they are today? What processes provide for, and threaten, our resources and our safety, and how did Hawaiians in the olden days manage to use these resources without modern materials? EARTH103 is a start to your understanding of these things.

ERTH103 introduces Hawai'i geologically. It surveys Hawaiian geology and geologic processes. Includes origin of the Hawaiian Islands, volcanism, rocks and minerals, landforms, stream and coastal processes, landslides, earthquakes and tsunamis, groundwater, and geologic and environmental hazards.

This course will interleave geologic processes and places, starting from Lō'ihi (the youngest Hawaiian volcano) and moving NW along the chain to finish at Meiji Seamount (the oldest Hawaiian volcano). We will cover processes along the way as we need them. For example, Kilauea is an active volcano, so we'll have to cover how magma is produced there. However, erosion only becomes a major geological process once a volcano starts to die off, so we won't cover it until we get to Mauna Kea and Kohala, and so on. The goal is that by the end of the semester; you will be able to look at the entire Hawaiian-Emperor volcanic chain and understand how it got there, why it is not the same all along the chain, and what the geologic future may hold.

The most important thing in EARTH 103 is not what I teach but what you learn. Learning is an active process – you have to do something to learn. In this class, reviewing online course materials, doing homework/quizzes, and reading are very important.

ADDITIONAL INFORMATION

This is an online (asynchronous) but students are encouraged to visit lab during the office hour or any convenient time. You can earn extra credit by doing so

DISABILITIES ACCOMMODATIONS

If you have a physical, sensory, health, cognitive, or mental health disability that could limit your ability to fully participate in this class, you are encouraged to contact the Accessibility Counselor to discuss reasonable accommodations that will help you succeed in this class. Roy Inouye can be reached at (808) 235-7448, royinouy@hawaii.edu, or you may stop by Hale Kāko‘o 106 for more information.

SEX DISCRIMINATION AND GENDER-BASED VIOLENCE RESOURCES (TITLE IX)

Windward Community College is committed to providing a learning, working, and living environment that promotes personal integrity, civility, and mutual respect and is free of all forms of sex discrimination and gender-based violence, including sexual assault, sexual harassment, gender-based harassment, domestic violence, dating violence, and stalking.

If you or someone you know is experiencing any of these, WCC has staff and resources to support and assist you. To report an incident of sex discrimination or gender-based violence, as well as receive information and support, please contact one of the following:

Leslie Cabingabang, Confidential Advocate
Phone/Text: ((808) 348-0432 or (808) 341-4952
Email: advocate@hawaii.edu
Office: Hale Kāko‘o 107

Desrae Kahale, Mental Health Counselor & Confidential Resource
Phone: (808) 235-7393
Email: dkahale3@hawaii.edu
Office: Hale Kāko‘o 101

Karen Cho, Deputy Title IX Coordinator
Phone: (808) 235-7404
Email: kcho@hawaii.edu
Office: Hale ‘Alaka‘i 120

As a member of the University faculty, I am required to immediately report any incident of sex discrimination or gender-based violence to the campus Title IX Coordinator. Although the Title IX Coordinator and I cannot guarantee confidentiality, you will still have options about how your case will be handled. My goal is to make sure you are aware of the range of options available to you and have access to the resources and support you need.

For more information regarding sex discrimination and gender-based violence, the University’s Title IX resources and the University’s Policy, Interim EP 1.204, go to manoa.hawaii.edu/titleix/

ACADEMIC INTEGRITY

Work submitted by a student must be the student's own work. The work of others should be explicitly marked, such as through use of quotes or summarizing with reference to the original author.

In this class, students who commit academic dishonesty, cheating or plagiarism will have the following consequence(s):

Students will receive a failing grade for plagiarized assignments.

All cases of academic dishonesty are referred to the Vice Chancellor for Student Affairs.

ALTERNATE CONTACT INFORMATION

If you are unable to contact the instructor, have questions that your instructor cannot answer, or for any other issues, please contact the Academic Affairs Office:

- Location: Alaka'i 121
- Phone: (808) 235-7422
