AI & ChatGPT

Students may choose to use AI tools at their own discretion; however, using AI to generate or complete assignments in this class—without explicit permission—constitutes academic misconduct and violates the Student Code of Conduct.

While AI can be a helpful resource for brainstorming or checking understanding, relying on it to do your thinking for you weakens your critical-thinking skills, reduces your ability to communicate, problem-solve independently, and ultimately does you a disservice. Over-dependence on AI can create long-term academic and professional disadvantages.

Submitting AI-generated work as your own is prohibited and will result in disciplinary action, which may include failing the assignment, failing the course, or further sanctions as outlined by the institution.

Your Responsibility with AI:

- Verification: You must verify the accuracy of all submitted content. Never assume AI data is correct.
- Scientific Reasoning: Your work must reflect your own ideas and critical-thinking skills. Understanding and intention comes from working through the problems and data yourself, and avoiding this could render your methods meaningless.
- Ethics & Integrity: You must be mindful of how AI usage can coincide with scientific ethics. Do not input sensitive data or proprietary information into AI tools. Avoid using AI in a way that will generate falsified or fabricated results.
