UNIVERSITY of HAWAI'I
WINDWARD COMMUNITY COLLEGE
Ke Kulanui Kaiāulu o ke Koʻolau

Math 242 (Calculus II) Course Syllabus

(Credits: 4 / CRN#: 62300 / Mode: Online - Asynchronous / 2nd 8-wk Fall 2026)

Important Websites: https://lamaku.hawaii.edu & www.MyMathLab.com

Windward Community College (WCC) Mission Statement

Windward Community College offers innovative programs in the arts and sciences and opportunities to gain knowledge and understanding of Hawai'i and its unique heritage. With a special commitment to support the access and educational needs of Native Hawaiians, we provide the Koʻolau region of Oʻahu and beyond with liberal arts, career and lifelong learning in a supportive and challenging environment — inspiring students to excellence. [Hawaiian Translation]

Instructor Information

How to Contact Your Instructor

Professor: *Navtej (Johnny) Singh* || Office Location: *Manaopono 103A*
E-Mail: *navtej@hawaii.edu* << *This is the best way to get in touch. Provide name & class information*>>
Zoom Video Link: https://hawaii.zoom.us/j/2025344398 <<Meeting ID: 202 534 4398 >>
Zoom Office Hours: Wednesday 8am – 10am *& by appointment*
Office Telephone #: *(808) 236 – 9278 << If I don't answer leave a message with contact information* >>

About Me

I have been teaching Math in the UH system since 2002. My undergraduate and postgraduate degrees are in mathematics from CSUF with minor in Computer Science and Physics. To roundup my STEM field, I obtained a post graduate degree in Electrical Engineering from UH Manoa. Furthermore, I conducted research at Lawrence Berkeley National Laboratory on Applications of Bayesian Data Analysis. Outside of work, I love spending time with my family, traveling, and being active (hiking, surfing, basketball).

Communication & Regular Substantive Interaction (RSI)

Online courses at WCC follow the Communication & Regular Substantive Interaction (RSI) guidelines for ensuring quality instruction. You can expect me to communicate with you frequently (and in a timely fashion) about our coursework in the following ways during the term:

- E-mail will be our primarily mode of communication (make sure to check your UH email frequently). I will do my best to response to your emails within 24 hours on instructional days (perhaps much sooner). This is an effective method of communication if you expect a short response.
- Instructor will also communicate important information with students via announcements at lamaku typically once a week.
- You can connect with me via Zoom Video (using the ID 202 534 4398) during my dedicated office hours or schedule an appointment during different that can work both of us.
- You can also connect with me via my office phone (808) 236 – 9278 during my office hours or leave a voice message for me to return your call.

- Q & A Lamakū Discussion Board: You may post general questions about the course, homework, etc., to the Q & A forum. This is a public space where both students and the instructor can respond.
- Individual grades appear instantly in the MyMathLab Gradebook for all auto-graded work. Handwritten assessment feedback is typically available within three days of the due date.

Course Information

Course Description
Differentiation and integration concepts of trigonometric, exponential, logarithmic and hyperbolic functions. Integration implements, infinite series, and applications of derivatives and integrals are also featured. Pre-Requisites: Grade of C or better in MATH 205 or MATH 241 or equivalent or consent of instructor.

Course Format
The course is delivered fully online with no required real-time meetings and students engage with content independently as written out on the schedule. Students can reach out to instructor when need. Students can also virtually interact with each other via discussion board in Lamakū.

Student Learning Outcomes (SLOs)
Upon completion of the course, the student will be able to:
- Demonstrate proficiency in determining limits, derivatives, and integrals associated with the topics in the course.
- Use concepts from the course to solve applied problems.
- Demonstrate proficiency in working with sequences or series.
- Utilize precise mathematical language and symbols to effectively communicate mathematics in written and/or oral form.

All SLOs assessment are embedded in class activities, homework, quizzes, or exams.

Learning Resources and Materials

This course is participating in the Bookstore's Interactive Digital Access Program (IDAP). Through this program, via Lamaku, you will access your course material digitally, and it will be available to you by the first day of class. A charge for the digital course material through IDAP will be added to your MyUH account. You have the option to opt-out of receiving your course material through IDAP. By opting-out, you will lose access to the course material and the charge will be refunded on your MyUH account. If you do not opt-out, the charge will stay on your MyUH account. Any unpaid charges on your MyUH account will turn into a hold. Holds on your account will prevent you from accessing various services within the University. You may opt-out by visiting your unique Inclusive Access Student Portal, which can be found in your IDAP welcome email (Subject Line: "IMPORTANT: You have enrolled in an IDAP Course"). For more information regarding IDAP, please contact your campus bookstore. For reference we are using "Calculus" (3rd ed) by Briggs for this class. I recommend that you have a graphing calculator utility to help you with homework. A free graphing utility is available at https://www.desmos.com. In addition, there are various graphing applications available for use on smartphones and tablets. If you are planning to buy a stand along graphing calculator TI 83/84 (regular or plus) is recommended. A reliable Windows or Mac computer with access to stable broadband internet is required for this course. Students may be able to borrow a graphing calculator, a computer, or a wifi hotspot

for the semester among other things from Windward Community College Library. The library also provides AI Essentials Guide resources for students.

Tasks and Grading

Point Distribution		
Consultations	Two Meetings @ 10 points each	020 pts
Homework	27 Assignments on MML @ 10 points each	270 pts
Portfolio	Written Work for HW + Final Review	060 pts
Exams	Three @ 100 points each	300 pts
Final Exam	Comprehensive	200 pts
Total Points		850 pts

Each letter grade for the course will be assigned according to the level of achievement as provided in the table below:

Letter Grade	Definition
A	90% - 100% of the cumulative points possible
B	80% - 89% of the cumulative points possible
C	70% - 79% of the cumulative points possible
D	60% - 69% of the cumulative points possible
F	Less than 60% of the cumulative points possible
CR	70% or above of the cumulative points possible
NC	Less than 70% of the cumulative points possible
W	Official Withdrawal

Students must apply for CR/NC grading option at the Admissions Office by the posted deadline. If a student does not apply for CR/NC grading option at the Admissions Office by the required deadline and if s/he does not withdraw, a letter grade (A, B, C, D, F, N) will be assigned for the course. The W grade is given only when the student officially withdraws from the course by the posted deadline. The "I" grade is a temporary grade given at the instructor's option when a student has failed to complete a small part of a course because of circumstances beyond his or her control. The "I" grade is given by student request and must be approved by the instructor. Students can use MyMathLab gradebook to see current grades based on submitted work; unattempted or past due date assignments are excluded until end of the term.

Homework

There are 27 homework assignments in this course available via MyMathLab.com due by the date indicated on the schedule page of this syllabus. On average student are expected to complete about two homework assignments per week. You may attempt a homework problem as many times as needed, till you get it right. You may continue to work on the homework after the due date; however, there will be a 1% penalty per day on the any portion of the homework done after the due date. While this may not be much for a day or two late submissions, it will add up to a high percentage over longer period. Refer to the schedule page for the absolute last day to work on the homework assignments. To receive help on the homework, students are welcome to reach out to me during dedicated office hours or make an appointment for consultation.

Portfolio

Since MyMathLab only requires you to enter the answers, it is important that you understand the correct process leading to the final answer. Therefore, I am asking you to show your work for each homework problem on a separate sheet of paper that will be part of your portfolio. In addition, your portfolio should include written work for the final exam review. To earn portfolio points, simply scan your written work for each homework as pdf file (one file per homework) and upload it to designated folder at Lamaku. Make sure uploaded files are clearly labeled with correct assignment name and number. Note that your portfolio work will be graded based on neatness, completion, and organization at the end of the term.

Exams

There will be three scheduled unit exams and a comprehensive final exam for this course. Best way to prepare for the exams is to study related homework and provided practice exams (or review sheets). For exam dates, refer to the last page of this syllabus. Make-up for any missed exams is not allowed after the due date. Note that all exams are conducted via mymathlab.com. Students will be required to show their work for all problems on a separate sheet of paper and upload it to designated folder at Lamaku within given timeframe. Some or all exams (including the final) may need to be taken in the proctored environment. Instructor will share additional information about each exam via email at least a week prior to exam dates.

Consultations

There are two required consultations in this class worth 10 points each that can be conducted via connecting through zoom video with me during dedicated office hours or scheduling a meeting at convenient time.

- 1st Consultation: Your participation in class orientation will count as your first consolation. During the orientation, I will go over the course syllabus and answer any questions or concerns students may have about this class. Instructor will post an announcement at lamaku providing detail regarding orientation.
- 2nd Consultation: To get credit for second consultation, students meet with the instructor via zoom individually before the last day to drop the class without W (see the schedule page for this date). This general-purpose consultation will be used to answer your questions, review your submitted homework, and discuss ways to improve grades among other things.

Note that the purpose of these consolations is for me to connect with each student at least couple of times during the term. I encourage you to reach out to me for help as often as needed.

Student's Responsibilities

Responsible students take ownership of their actions by exhibiting the following behaviors:

- Take an active role in learning and set aside adequate time for doing assignments
- Maintain a positive and inquiry attitude towards learning.
- Complete assignments by the designated dates with attention to quality of work.
- Actively communicate with instructor and seek immediate help when needed.
- Be proactive and do not procrastinate since new concepts are built on previously learned material.

Grading Rubrics for Written Problems

- **Full Credit:** Demonstrates complete understanding, uses correct algorithms with proper notation, and provides a clear, thorough, well-organized explanation.
- **Partial Credit**: Shows general understanding with mostly correct algorithms, minor errors, and a somewhat organized explanation using mostly relevant information.
- **Very Little Credit:** Shows limited understanding, major algorithm errors, minimal relevant information, and a weak or unclear explanation of the solution process.
- **No Credit:** Shows no understanding, provides no relevant information or valid process, and fails to explain key parts of the problem.

Getting Help

In addition to reaching out to me for help (via zoom using the ID 2025344398 or google meet using the ID navtej@hawaii.edu), you may also utilize the following websites resources:

- Ka Piko Center - Provides online tutoring via WCC Math Lab
- http://manoa.hawaii.edu/ola - Provides free live interactive tutoring during weekdays
- http://www.hawaii.edu/tutor – Provides free 24/7 online tutoring using your UH username & password.
- http://www.khanacademy.org – Provides small lecture videos on selected topics
- https://www.wolframalpha.com – Provides computational tools, facts, and examples.
- Lecture Videos - Provides complete lecture videos on topics in Calculus II by Professor Leonard.

Important Information

Please check your @hawaii.edu e-mail account frequently for important announcements. Note this syllabus is subject to change in extenuating circumstances. All online homework assignments are due by midnight of the deadline date. All due dates for homework assignments and exams are listed on the schedule below. If you need to discuss your performance, I recommend you get in touch with me as soon as possible. E-mail is the preferred method of communication. Instructor will inform you of any additional opportunity such as extra credit when or if they become available. For important academic information refer to WCC website www.windward.hawaii.edu or go to www.hawaii.edu for system wide information. Plagiarism, or copying and use of another's work without proper acknowledgment, is not permitted and may result in failing grade for the course. In the event instructor cannot be reached, you may contact the Academic Affairs Office at (808) 235-7422 or email wccaa@hawaii.edu.

Academic Integrity

Students are encouraged to utilize Artificial Intelligent (AI) tools to explore concepts taught through MLM homework assignments in this class (UH Executive Policy 2.220 Artificial Intelligence). However, students are not allowed to collaborate with each other or use AI tools on quizzes or exams. In this class, students who commit academic dishonesty, cheating, or plagiarism will receive a failing grade for plagiarized

assignments. All cases of academic dishonesty are referred to the Vice Chancellor for Student Affairs. (Windward CC Student Conduct Information UH System Student Conduct Policy EO 7.208)

Disabilities Accommodation

The WCC Disability Student Services Office is committed to providing equal access to qualified students with disabilities. If you have a physical, sensory, health, cognitive, or mental health disability that could limit your ability to participate fully in this class, you are encouraged to contact the Disability Specialist Counselor to discuss reasonable accommodations that will help you succeed in this class. The Disabilities Counselor can be reached at 808-235-7448, wccdsso@hawaii.edu, or stop by Hale Kakoʻo 106 for more information.

Participation Verification

Campuses are required by federal regulations to verify the participation of students in their classes. In accordance with Executive Policy 7.209, all students in the University of Hawai'i system are required to establish "participation" to ensure that they are not dropped from their class(es). Effective fall 2021, students who fail to participate by the late registration period for a class will be administratively dropped from that class. Students may also be dropped from dependent prerequisite and/or corequisite classes if both courses do not establish participation. *To complete this requirement, a student must sign up for MyMathLab.com and complete the first assignment by the indicated date on the schedule.*

Title IX

Windward Community College is committed to providing a learning, working, and living environment that promotes personal integrity, civility, and mutual respect and is free of all forms of sex discrimination and gender-based violence, including sexual assault, sexual harassment, gender-based harassment, domestic violence, dating violence, and stalking. If you or someone you know is experiencing any of these, WCC has staff and resources to support and assist you. To report an incident of sex discrimination or gender-based violence, as well as receive information and support, please contact one of the following:

UH Confidential Advocate Phone: (808) 348-0663 Email: advocate@hawaii.edu	Desrae Kahale, Mental Health Counselor & Confidential Resource Phone: (808) 235-7393 Email: dkahale3@hawaii.edu	Mychal Ozoa-Aglugub, Title IX Coordinator Phone: (808) 235-7468 Email: mozoa@hawaii.edu

As a member of the University faculty, I am required to immediately report any incident of sex discrimination or gender-based violence to the campus Title IX Coordinator. Although the Title IX Coordinator and I cannot guarantee confidentiality, you will still have options about how your case will be handled. My goal is to make sure you are aware of the range of options available to you and have access to the resources and support you need. For more information regarding sex discrimination and gender-based violence, the University's Title IX resources and the University's Policy, Interim EP 1.204, go to manoa.hawaii.edu/titleix/

Math 242 Fall 2026 2nd 8-Week Term Schedule* (Assignment Due Dates)				
MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY
10/19 **Orientation**	10/20 HW #01 (§7.1)	10/21 HW #02 (§7.2)	10/22 HW #03 (§7.3)	10/23 HW #04 (§7.4)
